

## Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**The Galacum Fund**  
**Class A Accumulation [ISIN: GB00BF029032]**  
**Class A Income [ISIN: GB00BF029255 ]**

The Authorised Corporate Director of the Fund is Evelyn Partners Fund Solutions Limited, part of the Evelyn Partners group.

## Objectives and investment policy

The Fund aims to achieve capital returns with some consideration given to income dependent on market conditions, by investing in any country and in any economic sector of the world.

Typically, the Fund will invest mainly in:

- other investment funds (regulated and unregulated investment funds), mainly to gain exposure to shares and bonds issued by governments and other organisations.

The Fund may also invest in:

- transferable securities (includes shares and bonds issued by governments and other organisations)
- warrants
- gold
- cash, deposits and money market instruments.

There may be circumstances when due to market conditions the property of the Fund may be invested primarily or solely in one asset type or solely in cash.

The Fund may use derivatives and forward transactions for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital. The Fund may only use derivatives and forward transactions for investment purposes on the giving of 60 days' notice to Shareholders. The Fund does not currently use derivatives and forward transactions for investment purposes.

The Fund will not maintain an interest in immovable property or tangible movable property.

Accumulation Shares: Any income the Fund generates will be reinvested.

**Income Shares:** Any income the Fund generates will be paid out to you.

**Recommendation:** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy and sell shares on the 14th day and the last business day of the month except where the 14th is not a business day when it shall be the next business day thereafter.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

For full investment objectives, policy details and risk factors, please refer to the Prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

**Typically lower rewards,  
lower risk**

**Typically higher rewards,  
higher risk**

- The Fund is in a higher category because the price of its investments have risen or fallen frequently and more dramatically than some other types of investment. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Where the Fund invests in warrants, these may be hard to buy and sell and their prices may move up and down suddenly. This could significantly impact investment performance. Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.
- Where the Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of the Fund.
- Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.
- The Fund is entitled to use derivative instruments for EPM. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund. The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- The price of gold or other resources may be subject to sudden, unexpected and substantial fluctuations. This may lead to significant declines in the values of any companies developing these resources in which the Fund invests and significantly impact investment performance.
- The Fund may invest in securities not denominated in sterling, the value of your investments may be affected by changes in currency exchange rates.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	7.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year	
Ongoing charges	1.11%

Charges taken from the Fund under specific conditions	
Performance fee	NONE

- The ongoing charges figure is based on the last year’s expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- Previously, the Ongoing Charges Figure (OCF) included expenses incurred by a Fund on any investments in collective investment schemes and closed ended vehicles such as investment trusts (the synthetic OCF). Following guidance issued by the Investment Association on 30 November 2023, any synthetic OCF now excludes the expenses of closed ended vehicles.
- A dilution adjustment may be applied to adjust the price of shares, as it may be necessary to reduce the difference between the cost of buying or selling the Fund’s investments and the Fund’s mid-market share price.
- The Fund’s annual report for each financial year will include detail on the exact charges made.
- The ongoing charges figure is for the year ending 31/10/2023.
- For further information about charges, please refer to relevant sections in the Fund’s Prospectus.

Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 30/05/2017.
- Share/unit class launch date: 30/05/2017.
- Performance is calculated in GBP.
- All charges and fees, except any entry, exit or switching charges, have been included within the performance calculation.

Practical information
