

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Scottish Widows Emerging Markets Fund Class A Accumulation

A sub-fund of the Scottish Widows Tracker and Specialist Investment Funds ICVC.
The Fund is managed by Scottish Widows Unit Trust Managers Ltd, part of the Lloyds Banking Group.
ISIN: GB0031904252

Objectives and investment policy

To achieve capital growth by investing in shares of companies which are part of the MSCI Emerging Markets Index (the "Index").

The Fund Manager seeks to outperform the Index by 1.25% per annum on a rolling 3 year basis, before deduction of fees.

At least 80% of the Fund will be invested in shares of companies which are based in developing countries or have a significant proportion of their business activities in one or more of those developing countries.

The Fund may only take limited positions away from the Index. This means there are limitations on the extent to which the Fund's investment in various sectors† may differ to the Index. These limited positions can be more than is held in the Index (overweight) or less than is held in the Index (underweight). The limits help to provide a balance between the spread of assets within the Fund and risk management. They also provide a balance between the amount the Fund can vary from the Index and providing the Fund Manager with flexibility to seek to outperform the Index. As a result, the Fund's performance may differ from the Index.

Derivatives and stock lending may be used for the purpose of managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth (often referred to as efficient portfolio management).

† A sector is a business area, industry or economy which shares the same characteristics. Company shares are typically grouped into different sectors depending on the company's business, for example travel and leisure or telecommunications.

The MSCI Emerging Markets Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities across 24 emerging market countries.

Investors should aim to hold their investment in the Fund for the medium to long term (at least five to ten years). Any Income received by the Fund is retained in the Fund and has the effect of increasing the share price. We calculate the value of the Fund at 8am daily on working days in the UK. Our dealing times are from 9am to 5pm each working day. Instructions received before 5pm will receive the next day's price.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← → Typically higher rewards, higher risk

- The Fund is ranked at 6 because it has experienced high levels of volatility over the past 5 years.
- The value of your investment and any income from it is not guaranteed and can go up and down depending on investment performance. Specific investment risks for the Fund are:
 - Company shares ('equities') generally offer higher long term growth potential than some other asset classes. Values can fluctuate considerably. There's a greater risk you might not get back all of your money.
 - Exchange rate changes might cause the value of overseas investments and any income from them to go up and down.
 - Emerging markets investments may suffer large price fluctuations. They are generally less well regulated than UK markets with less investor protection. Assets may be traded less often and in low volumes.
 - As the Fund invests predominantly in companies which are part of the MSCI Emerging Markets Index, performance, before charges, may fall and rise with the Index.
 - The use of derivatives for Efficient Portfolio Management might not achieve the described outcomes and may result in greater fluctuations of the value of the Fund, however it is not intended that this will cause the risk profile of the Fund to change.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

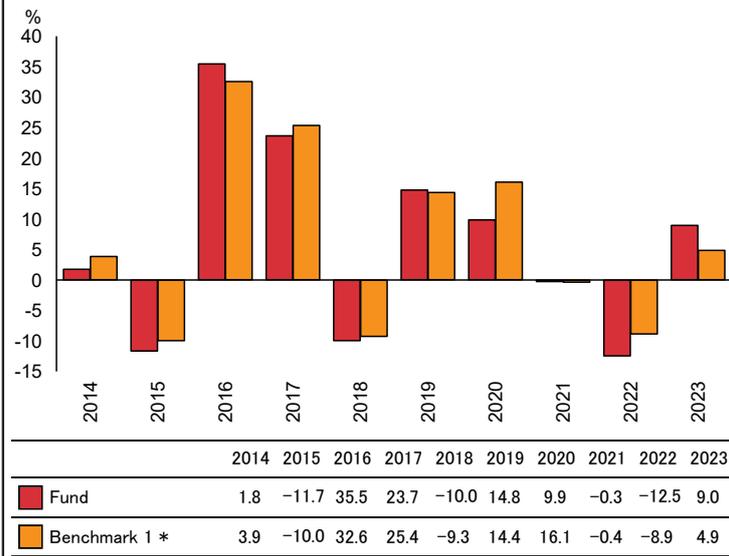

Ongoing charges	0.90%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- There is no charge to switch into this fund.
- The Ongoing Charges Figure (OCF) is as at 30/09/23.
- The annual report for each financial year will include detail on the exact charges made.
- The OCF is taken from the income of the Fund. For more information about charges, please refer to the Prospectus of Scottish Widows Tracker and Specialist Investment Funds ICVC, which is available at www.scottishwidows.co.uk/kiids

Past performance

Source: FE fundinfo 2024

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 02/06/1997.
- Share/unit class launch date: 02/06/1997.
- Performance is calculated in GBP.
- Performance is net of charges and net of tax.
- The Index plus outperformance target and the Fund performance figures are shown on an annual basis.
- In practice, as explained in the 'Objectives and investment policy' section, the Fund's outperformance target applies over a rolling 3 year basis.
- In addition, the Index plus outperformance target is calculated without deduction of charges whereas Fund performance is calculated after deduction of charges.
- The performance table illustrates past performance of the Fund and its benchmark index. The outperformance target is applied to the index and we illustrate it in the figures from 07/08/2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.
- * Benchmark 1 – Benchmark
